Description:

We seek one (1) Post-Doctoral research associate for our experienced members' team, with background in European Research Projects. The candidate will participate in the R&D activities of FORTH in the context of the project EPI SGA-1: "European Processor Initiative". The EPI SGA-1 project will be the first phase of the European Processor Initiative Framework Partnership Agreement (EPI FPA), and aims to design and implement a roadmap for a new family of low-power European processors for extreme scale computing, high-performance Big-Data and a range of emerging applications.

Requirements

- PhD in concurrent and distributed algorithms or related field.
- Physical presence at FORTH, Heraklion, Crete for the duration of the position
- Fluent knowledge of English
- Names of at least two professional references.
- Demonstrated experience in EU-funded and nationally funded projects, in both technical and project management roles
- Demonstrated experience with performance measurement and optimization of large-scale data-driven workloads.

Desired qualifications

- Experience with the development of efficient ML systems (model training, inference) using data-parallel accelerators.
- Demonstrated experience with concurrent algorithms, analytical models and simulation for datacenter environments, especially at large scales.

Application Submission

Interested candidates can submit their applications via <http://www.ics.forth.gr/jobs> using the link “Apply for the position” under the announcement. Applications must include:

- Detailed CV, including qualifications and interests in the above areas, and proof thereof
- Scanned copies of academic titles

Promising candidates may be invited for an interview before a decision is made.
